

cable plant design, installation and maintenance

Datatrend builds state-of-the-art cabling infrastructure designed to meet your unique needs while delivering a lifetime of consistent, superior performance. National rollouts and other large-scale, multi-site projects are completed in a timely and cost-effective manner, utilizing our global network of certified partners.

Datatrend combines state-of-the-art design and cabling prowess with a flexible business model that ensures cost-effective solutions for any size project, from single-site installations to large-scale national or global rollouts.

The success of your network depends on a top-quality, carefully planned implementation. Datatrend Technologies specializes in full-service design, installation and maintenance of network projects across a wide range of industries. We customize your project to meet your particular needs.

Datatrend has a solid track record building virtually every type of network, including voice, data, fiber and wireless environments. Our skilled, experienced consultants and engineers work closely with your entire project team to develop an optimal and cost-effective design for your rollout or single-site implementation project. All our design work adheres to national, state and local codes, as well as the most rigorous industry and manufacturer standards (BICSI, NEC, NESC, TIA, EIA, IEC, ANSI and CSA).

Datatrend ensures the uniformity of job requirements and minimizes costs to your company. Experienced in Cat-5e, Cat-6 and fiber-optic wiring systems, we also perform and manage all testing and certification requirements.

The Datatrend difference.

Datatrend's Cable Plant Design, Installation and Maintenance group is an experienced industry leader equipped with proven tools and methodology to assure a highly successful outcome, regardless of the size and scope of your project. Our cabling infrastructure solutions are built to deliver a lifetime of consistent, high-quality performance.

Knowledgeable. Our experienced and certified staff of BICSI Registered Communication Distribution Designers (RCDD) produces state-of-the-art designs engineered to reflect the latest industry standards.

Global capabilities. We manage more than 1,200 Datatrend-certified partners throughout the world, which allows us to provide cabling for large-scale, multi-site projects in a timely, consistent and cost-effective manner. Our network also assures rapid completion of service requests after the initial installation, with minimal disruption of your day-to-day operations.

Certified systems with 20-year warranty. In addition to manufacturers' warranties for hardware and software, Datatrend offers a free 20-year warranty on every installation. If we install it and maintain it, we guarantee it.

Complete documentation. Datatrend provides you with everything you need for local site and corporate support purposes, including complete, accurate floor plans and digital photos showing every installed cable and its location, equipment room layouts, and testing and certification results for every installed cable.
