

systems installation

Datatrend offers a single-source solution for systems installation that streamlines even the most complex technology projects. Working with a single partner, rather than multiple vendors, enhances speed to market, minimizes interruptions and reduces costs.

Every phase of your installation – from cabling to equipment deliveries to circuit activations – is managed and synchronized to assure a timely and successful deployment.

Systems installation is the core of your technology project. Its ultimate success depends on the skill, expertise and commitment of your solutions partner.

Since 1987, Datatrend has been a leader in systems installations, and many of the country's largest, best-known companies have relied on our expertise. Our proven capabilities span a wide variety of industries and installation types, from retail point-of-sale (POS) equipment to enterprise class Voice over IP (VoIP) to wireless (802.11 and RFID) and property management systems.

Every installation – from network hardware to servers to PCs and printers – is tailored to meet your specific project requirements by our team of certified installation specialists, engineers and dedicated project managers.

The Datatrend difference.

Datatrend is an experienced industry leader, equipped with the proven tools and methodology to assure a highly successful installation, regardless of the size and scope of your project.

Single-source solution. Datatrend's systems installation services cover everything you need for a successful installation throughout the life cycle of your project, including:

- evaluation of site survey results,
- equipment logistic coordination,
- coordination of field service technicians,
- on-site installation of equipment and all necessary testing,
- site rollout schedule management.

Global capabilities. Datatrend's international presence allows us to reach across the globe, ensuring projects are completed quickly, consistently and cost-effectively, whether local, national or international in scope.

National rollout expertise. Datatrend's PMI-certified project management professionals and proven methodology ensure the consistency required for large, multi-site projects with complex installation requirements, such as national and international rollouts. All sites are fully prepared for a smooth, timely deployment, even under the most aggressive schedules.

Online access. Our state-of-the-art online project management tool, customized to your specific needs and requirements, delivers real-time information on your project status, as well as enables you to instantly submit service requests and changes. You enjoy interactive access, which enhances flexibility and helps control costs.

World-class support. Datatrend delivers all the post-implementation support you expect, including modifications you request after the initial work has been completed. We work with you to minimize the impact to your day-to-day operations and to prevent interruptions.
