

Virtualization-in-a-BOX

Your virtual infrastructure is finally within reach

Virtualization-in-a-BOX

There's a lot to like about a virtual computing infrastructure - especially when you do it with Virtualization-in-a-BOX from Datatrend Technologies:

- The simplicity of an all-in-one solution
- Affordable and predictable all-inclusive pricing
- Ready to use, so you can immediately start realizing the benefits of virtualization
- Energy-saving and space-saving IBM® BladeCenter®
- The ability to maintain corporate standards across your enterprise, including multiple locations
- Three years of 24x7 support and maintenance on all hardware and software
- One phone number to remember for all your support needs

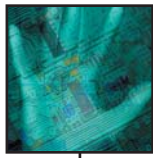

Virtualization-in-a-BOX from Datatrend Technologies eliminates the usual barriers of complexity, unpredictable cost, and drain on IT resources — to realizing your goal of a virtual computing infrastructure. An all-inclusive package, Virtualization-in-a-BOX comes to you preconfigured, tested, validated, and installed by our team of experienced IT professionals. Even with all these deliverables, our affordable pricing may be the most welcome feature of all.

The advantages of virtualization are compelling and well documented: lower capital expense, reduced energy usage, increased system availability, improved desktop management, strengthened security, and more reliable disaster recovery processes.

The question is, how will you get there? After all, setting up a virtual infrastructure requires intensive sourcing from multiple vendors for hardware, software, and consulting services. It also eats up enormous chunks of IT resources for installation, integration, and configuration. Worst of all, the initiative frequently ends with a severe case of sticker shock.

Expect a dramatically different experience when you choose **Virtualization-in-a-BOX** from Datatrend Technologies.

Virtualization-in-a-BOX

The Datatrend Difference
You can be confident in the people who install, configure, and integrate your virtual solution. Since 1987, Datatrend Technologies has delivered IT solutions to some of the world's most prominent and successful companies. We strive to go the extra mile for you, to anticipate your needs, to exceed your expectations. That's the "Datatrend Difference!"

A smarter, money-saving alternative to 'do it yourself'

Virtualization-in-a-BOX makes solid sense from a number of perspectives. Compared to other virtualization solutions, our package is:

- **More complete** - The package contains all the hardware, software, and implementation services needed to get your virtual infrastructure up and running. Nothing is overlooked, including three years of support and maintenance.
- **Easier to deploy and administer** - Think of the time, not to mention resources, you'll save by taking delivery of a pre-built solution: installed, configured, and ready to run in your facility. If you ever need support for any hardware or software component, you only need to call one phone number...ours.
- **A better value for your dollar** - Our clients tell us they're pleasantly surprised at how affordable Virtualization-in-a-BOX is. Plus, our all-in-one pricing allows you to budget with confidence.

We do the heavy lifting...and the homework

In developing Virtualization-in-a-BOX, we focused on sourcing the highest quality, most reliable components. Our bundling of industry-leading products and services features the IBM BladeCenter, a superior choice in several respects, including:

- Uses up to 50% less floor space and 35% less energy than competitive rack servers, without compromising performance
- Built on IBM X-Architecture®, the industry-standard blade solution for running your business-critical workloads
- All-in-one design, with servers, storage, networking, I/O, and management engineered into a single chassis
- Requires no special wiring — plug it into your standard office power outlets (applies to BladeCenter S only)
- Scalable to the growth and changing needs of your enterprise

Integrated with your IBM BladeCenter hardware is the VMware® VI3 Enterprise Edition. This proven software, from the pioneers in x86 virtualization technology, enables enterprise-class virtual machines that increase server and other resource utilization, along with improved performance, increased security, minimal downtime, and reduced cost and complexity.

Complete, flexible, tailored to your needs

Virtualization-in-a-BOX from Datatrend Technologies comes complete with these components:

IBM BladeCenter S

IBM HS21xM Quad-Core, Solid State Blade Servers

Qty 3 - 16GB Servers; Upgradeable to 32GB each & 6 Servers

Cisco Catalyst Ethernet Switching

VMware VI3 Enterprise Edition & Virtual Center Foundation (w/ MS Windows)

VizionCore vRanger Pro (Virtual Machine Backup Software w/ MS Windows)

Virtual iSCSI SAN Shared Storage with HA and Thin Provisioning

Redundant Controllers 1.8TB SAS Upgradable to 3.6TB

Scalable to 190 Virtual Machines **as low as \$780 per server***

One Stop 3 years 24x7 support and maintenance on all HW and SW

Onsite installation and training

BladeCenter E version also available

*Based on Full Utilization, Your Mileage May Vary Based on Workloads
