

Across the street or around the globe. New or upgraded network technology can enhance your business in countless ways. It can create new revenue streams, new marketing opportunities or streamline internal operations. But implementing a total network infrastructure without compromising your budget, timeframe or performance goals is a major challenge. Fortunately, there's an expert provider fully prepared to handle your most ambitious networking needs.

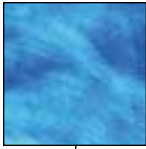

Whether your project involves one location or thousands across the world, Datatrend Network Services makes it happen – on time and on budget.

Datatrend Technologies' Network Services is a proven industry leader, specializing in complex network installations for voice, data, security, video, digital signage and wireless. We take an end-to-end approach, designing and delivering a solution that's precisely right for your project. Our best-in-class services include:

- Consulting
- Site surveys
- Procurement and staging of equipment
- Complete cable plant design, installation, de-installation and maintenance
- Systems installation
- Project management

The national rollout expert.

Datatrend is uniquely equipped to accomplish large-scale, multi-site projects, with particular expertise in regional, national and international rollouts. Our highly efficient, centrally managed model delivers exceptional value and speed for our customers. From our corporate headquarters to our worldwide network of more than 1,200 Datatrend-certified partners, we ensure rapid, efficient deployment of skilled resources.

The single-source solution for today's complex networking needs.

Many of the country's largest industry leaders rely on Datatrend Network Services to fulfill their most demanding projects. Our proven track record includes successful national rollouts for a wide variety of customers. Projects have included consulting, design and project management for...

- Installation of multimedia gift-registry kiosks at more than 1,300 locations for a major national retailer.
- Conversion of hardware and software at more than 500 properties for a leading hotel chain.
- Complete replacement of an existing wireless network for more than 1,000 retail locations throughout the United States.
- Implementation of a converged network/VoIP solution in more than 700 banking centers.
- High-tech design and completion of digital flat-panel multimedia advertising technology in unique, high-traffic environments.
- Complete implementation of a digital cinema solution in a quick and cost-effective manner.

The Datatrend difference.

Extensive experience. Since 1987, Datatrend Network Services has been a trusted technology partner to many longtime satisfied customers representing a wide range of industries.

Speed to market. Because we specialize in national and multi-national rollouts, we are uniquely positioned to expedite your project on a quick, aggressive timetable.

Online project management access. Datatrend offers a state-of-the-art online project management tool, customized to your specific needs and project requirements, to give you up-to-the-minute information on your project status. You enjoy real-time, interactive access, ensuring you increased control over project scheduling and costs.

Quality assurance. Datatrend adheres to the most rigorous industry standards and certification, including BICSI, RCDD and PMI.

Global capabilities. Only Datatrend has the trained resources immediately available to implement large-scale national and international rollouts. We manage a worldwide network of more than 1,200 Datatrend-certified partners.

20-year warranty. In addition to manufacturers' warranties for hardware and software, Datatrend offers an extended 20-year warranty on every installation. If we install it and maintain it, we guarantee it.

World-class support. Datatrend delivers the end-to-end managed service and consistent maintenance and support you expect from a world-class network services provider.
